NAPA VALLEY INSPIRATION

When one couple in Dallas began working with DeLeo & Fletcher Design, they shared a desire for their new home to feel "light, fresh and relaxed." The couple often spoke of their memories of Napa Valley wine country.

Inspired by the West Coast atmosphere, DeLeo & Fletcher's designers created a sense of casual luxury that flowed from the home's exterior courtyards to interior spaces.

From a generously proportioned pool terrace and cabana to a cozy alcove featuring a fire pit, the firm introduced a series of delightful spaces: an outdoor sculpture garden, interior and exterior fireplaces, stonework built with native materials – stunning yet comfortable spaces for family, friends and guests to enjoy.

No Napa-inspired home would be complete without its own wine-tasting room; this one features wall-to-wall refrigerated cabinetry for the owners' collection of spirits.

Dramatic architectural elements like the floating stairs are balanced by the bright, casual breakfast nook adjacent the kitchen.

This vibrant bedroom suite connects to the main house via a breezeway, providing a casual, cozy space for overnight guests.

CELEBRATING THE REVEAL

From the initial consultation, through building the home, finishing spaces and ensuring all final touches are in place, DeLeo & Fletcher's design journey with a client takes time. To celebrate the culmination of this collaboration, the firm arranges for an intimate welcome-home celebration.

"We ask them to step away a couple weeks, and then invite them back," explains DeLeo. "We have a beautiful housewarming party, the big reveal. We love having that magical moment for them."

A monochromatic color palette allows the rich textures in this guest bath to take center stage.
